

Offshore MARICULTURE Asia2018 Conference

In association with:

15-17 May 2018, Marina Mandarin, Singapore

Conference Programme Provisional

The Offshore Mariculture Asia 2018 programme will cover the full process of setting up an offshore operation, building on experiences learnt from established operations in the countries who pioneered in this industry, such as those in the European region.

Sessions will begin with an exploration of the early stages of the process such as site selection, moving from nearshore to offshore and choosing the right species, and will culminate with presentations on processes further down the chain such as marketing, investment and technology and feed section.

The conference provides the perfect opportunity for international experts, equipment suppliers and investors to meet the local stakeholders interested in moving to cage quality finfish production.
